PROFESSIONAL SUMMARY

Computer Science undergraduate with strong problem-solving skills (700+ DSA problems, 1633 rating). Experienced in machine learning, Generative AI, RAG and MERN stack development through academic projects and internships. Seeking Software Development or AI Engineer role to build scalable applications and AI - Powered solutions.

EDUCATION

Guru Gobind Singh Indraprastha University (Delhi Technical Campus)
Bachelor of Technology (B.Tech.) – in Computer Science & Engineering | **CGPA: 9.26**

Greater Noida, UP
2023 - 2027

EXPERIENCE

S.N Bose summer internship, NIT Silchar
Machine learning Intern

Jun 2026 - Jul 2026

- Developed an end-to-end machine learning pipeline for Early autism screening using **Python** and **Scikit-learn**.
- Performed data preprocessing and feature engineering by handling missing values, encoding categorical features, treating outliers, and balancing the dataset using **SMOTE**.
- Trained, compared, and optimized **Decision Tree**, **Random Forest**, and **XGBoost** models using **RandomizedSearchCV** and standard classification metrics.

Oil and Natural Gas Corporation (ONGC), New Delhi
Intern, Digital & Technology

Aug 2026

- Developed an **AI-powered Mock Interview System** to simulate technical HR interviews using **Generative AI**, **OpenCV** & **hugging face**.
- Designed and implemented user authentication and interview workflows, **integrating frontend, backend and AI components**.
- Built and customized a **SharePoint-based website** for the mentor to organise and present project-related information using Microsoft's enterprises collaboration ecosystem.
- Worked with Microsoft ecosystem like SharePoint and outlook for internal content management, and information sharing within the organisation.

PROJECTS

Early Autism Screening | [Github](#)
Python, Scikit-learn

- Developed an end-to-end machine learning pipeline for autism detection using Python, Scikit-learn, and XGBoost, including data preprocessing, feature engineering, and model evaluation.
- Compared multiple classification models and optimized performance through hyperparameter tuning.

KnowCampus - College RAG Assistant | [Github](#)

Python, Langchain, ChromaDB, Gemini, Groq, Streamlit

- Built a RAG-based college assistant for answering queries from institutional documents.
- Implemented document chunking, Gemini embeddings, and semantic search using ChromaDB.
- Developed a LangChain RAG pipeline combining retrieved context with prompt-based LLM generation using Groq.
- Designed a custom Streamlit interface with conversational chat and suggested queries.

SKILLS

Languages: C++, Python, JavaScript(ES6+), SQL

Web Tech: React, Node.js, Express.js, RESTful API, Firebase*

ML & Data: Scikit-learn, NumPy, Matplotlib, Pandas, Power BI*

Gen AI: LangChain, LangGraph, Ollama, RAG, LLMs, Gemini API

Database: MongoDB, MySQL

Tools: Docker, AWS(IAM, EC2)*, Postman, Git/GitHub

Core: Data Structures and Algorithms (DSA), Object Oriented Programming (OOP), Database Management System (DBMS), Operating Systems (OS), Machine Learning (ML)

* Elementary Proficiency

ACHIEVEMENTS

- Solved 700+ DSA Problems across platforms on Leetcode & GFG
- Rank 1** in Manthan Kriti Hackathon organised by DTC
- Rank 2** in GDG BOB - "The Coding Contest" on Unstop among 100+ students
- Rank 3** in CODEIGNITER - Intracollege coding competition
- Secured rank 3572 out of 25k+ participants in leetcode weekly contest
- HackerRank certified in problem solving with 5 star ratings in C++
- 1633 (maximum rating) on Leetcode
